

SAVE COSTS AND MAN POWER

USING MACHINE VISION TO ENSURE QUALITY!

Have you ever got a complaint and your goods back?

Automatic vision control ensures that you don't send poor quality to your customer.

Using standard machine vision packages like Halcon™ and inexpensive camera setups based on GigE technology BEC ApS provides easy-to-use custom vision applications for various applications.

Furthermore by providing a custom HMI interface the operator needs no special qualifications to operate our systems.

All our system provides statistics on the analysis.

Possible applications:

- Positioning
- 2D Measuring
- 3D measuring
- Bar/data code reading
- OCR and OCV
- Identification

These applications can be used in all kind of industries from food, packaging, automotive and surveillance to medical and pharmaceutical.
